This page tests the repair of words that lost letters. The font of some books draws two letters as one sign, and the PDF has no letter for that sign. The reader must put the letters back. The words emo€ons and condi€on lost the letters t and i in this way. The words emoons and uncondional lost the same letters with no mark at all. A short word such as the or and must stay as it is, and a real word such as station must also stay as it is.
